REPORT

ON THE

EXTERNAL TRADE OF BENGAL

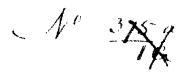

WITH

NEPAL, SIKKIM, AND BHUTAN,

FOR THE YEAR 1883-8-1.

PUBLISHED BY THE GOVERNMENT OF BENGAL.

Calcutta:

PRINTED AT THE BENGAL SECRETARIAT PRESS.
1884.

REPORT

EXTERNAL TRADE OF BENGAL

WITH

NEPAL, SIKKIM, AND BHUTAN,

FOR THE YEAR 1883-84.

The system under which the external trade of Bengal with Nepal, Sikkim, and Bhutan is registered has been described in previous reports, and no change was introduced in it during the year 1883-84.

2. The total value of this traffic registered during the past three years on all the important trade routes, at the 32 stations which are distributed along the frontier between Chumparun and Julpigoree, was as follows:—

		Imports into Bengal.					Ex	ports from Be	ngal.
From Nepal	•••	1881-82. Rs. 75,42.743 1,67,533	1882-83. Rs. 75 ,60,604 2 ,00,148	1853-84. Rs. 71,76,210 2.21,523	To Nepal		1881-82. R4. 55,36,668 86,011	1882-88. ks. 55,57,525 1.16,294	1893-84. Rs. 64,56,930 1,12,711
" Bhutan	•••	1,23,048	1,11,412	96,350	, Bhutan	• • •	1,05,108	86,693	1,23,000
Total	•••	78,33,324	78,72,194	74,94,083	Total	•••	57,27,847	57,60,512	66.92,641

3. In addition to these figures, which relate to the trade to and from stations in Bengal only, the total value of traffic with other provinces which passed over trade routes in Bengal in those years, was as follows:—

Year.		Imports into other provinces from Nepal.	Experts from other provinces to Nepal.		
				Rs.	Rs.
1881-82	• • •	•••	•••	4,38,040	5,63,732
1882-83	•••			4,55,050	4,29,117
1883-84		111		 1,28,423	5,56,168

4. The total value of the traffic registered amounted to Rs. 1,48,71,315 against Rs. 1,45,16,873 in 1882-83, and Rs. 1,45,62,943 in 1881-82, as shown below:—

Year.			Imports into Bencal. Rs.	Exports from Bengal. Rs.	Total. Ru.
1881-82	•••	•••	82,71,364	62,91,579	1,45,62,943
1882-83	•••		83,27,214	61,89,629	1,45,16,873
1883-84	•••	***	76,22,506	72,48,809	1,48,71,315

It will be seen that the gross value of the trade during 1883-84 was 2.44 per cent. in excess of the figures of the preceding year, and 2.12 per cent. over those of 1881-82. The import trade, however, shows a material falling off, the figures for the past year being 8.46 and 7.84 per cent. below those of the two previous years respectively. Under exports, there was an increase of 17.11 per cent. as compared with 1882-83, and of 15.21 per cent. as compared with 1881-82. The chief staples in the import traffic which showed the largest decrease during the past year as compared with 1882-83, were food-grains, timber, and silver; and the articles showing the largest increase were precious stones and pearls (unset), cattle, opium, linseed, and saltpetre. As regards exports, the greatest improvement is found in European piece-goods, metals, provisions, treasure, horses, salt, tobacco, and unrefined sugar, while manufactured woollen goods showed a decrease.

5. In the report for 1882-83 it was observed that the information furnished imposts levied by the Nepsless by the local officers of the frontier districts regarding the imposts levied by the Nepsless authorities on traders after they leave, or before they enter British territory, showed that the rates of duty at different points on the frontier varied considerably. With the

object of obtaining complete and satisfactory information, so as to admit of a comprehensive review of the subject, each of the local officers concerned was furnished with copies of the reports submitted by the others, and they were requested to institute careful personal enquiries into the matter, and report the result for the information of Government. They were also asked to consider how far the fluctuations in the imports and exports at the different registering posts were the results of variations in the rates of duty levied at different points. In accordance with these orders, the frontier district officers have collected as much information upon the subject as was possible, and they have been requested to continue to devote their particular attention to this subject during their annual tours, and submit periodical reports of any changes that may hereafter come to their knowledge. The substance of the reports is given in the ensuing paragraphs.

So far as has been ascertained there are at present 35 toll stations on the northern frontier of Bengal between Chumparun Ghats, or Nepalese toll stations, along and Darjeeling at which imposts are levied by In Chumparun all articles of trade pass to and the Nepalese authorities. from Nepal by Semra Basa, Semrown, Hetaura, Bhichakhori, Sirsa Gudhi, Ghat Sirsia, Chapkatia, Mushurwa, Amerputte, Bhim Phendi, Matearwa, and Tribeni Ghât along the frontier, and there are toll stations at all these places. The lighter and more valuable classes of goods are sent to Nepal by the Sigowli route as a matter of convenience, because it is the most direct road to the frontier. Heavy goods are sent up by river, and country produce is brought down from Nepal, either by river or by the Thori route, as it suits the convenience of exporters.

In the Mozufferpore district the imposts are levied at the ghats nearest to the five British registering stations of Bairagnia, Majorgunge, Sonbursa, Bela, These ghats are situated within Nepal territory on the paths and Sursund. leading from the interior of Nepal to the markets on the British frontier. In some cases as many as three of these ghats, at each of which a separate toll is levied, are situated between the frontier and the markets in the interior of Nepal with which trade is carried on.

There are five ghats on the borders of the Durbhunga district at which imposts are levied, namely, Bashita Ghât opposite to Deodha, Banarputti Ghât opposite to Ladania, Sabaila opposite to Harlakhi, Bhugwanpore opposite

to Lowkahi, and Jamuni opposite to Andra Muth.

The farmer of the sayer mehal of four pergunnals in Nepal on the frontier of the Bhagulpore district has collecting stations at Bishoonpore in Nepal, opposite Beerpore, and at Cheh Pahari Nurha, opposite Puchpararia (Puchpandaria), and another Bishoonpore, opposite Bilundi, a village three

miles east of Kanhouli (Kundowli); also another ghat opposite Kundowli.

10. On the frontiers of the Purneah district the duties are levied in the Morung district of Nepal, while as regards Darjeeling the imposts are levied at four stations in the Nepal Terai, viz., Eroongtar, Dhoolabaree, Dohuguri, and Baradhasi, and at five stations in the hills, viz., Mamringtar, Bundooka,

Goorkhajagat, Feekul, and Monglong.

The Nepalese Government maintains no regular Custom House, and the imposts are levied on the farming system. Along the frontier of the Chumparun district, it is said that in some places the taxes are farmed, while in Agency employed for the collection of the imposts. some places they are held khas. The Collector of Mozufferpore writes:—"The imposts in question are levied by thikadars, who are said to take annual farms of them from the Chowdhries, and these Chowdhries are said to be subordinate to an officer known as Captan." The Collector of Durbhanga was informed that the farms along the frontier of his district were all disposed of from head-quarters (Khatmandoo), and that the local "Sooba" had not even to keep an eye on the farmers for the prevention of any malpractices that they might be inclined to commit. The District Officer of Bhagulpore states that the farmer of the sayer mehal, who is a British subject, "has to bid every year for the mehal, and he again sub-lets to highest bidders. The sayer mehal includes, besides the collection of import and expert duties, the market dues of all hats in the four pergunnahs, and phulkar, and a tax on hides. He has sub-lessees under him, but his name alone appears in the Nepal Government books, and

he is solely responsible to the Nepalese Government. His lease gives him authority to levy market-dues, &c., only from the revenue-paying villages. The lakhirajdars of the revenue-free villages make their own arrangements as regards sayer dues." The agency employed by the Nepalese Government in the Morung District of Nepal (marching with the district of Purneah), and along the border of the Darjeeling District, is not particularized in the local reports.

- The District Officer of Mozufferpore writes:--"Attempts are sometimes made by the thikadars to enhance the rates, and complaints on this subject are sometimes instituted by aggrieved British subjects before the Nepalese officials. The fact of the institution of these complaints would seem to show that the force of custom in regulating the rates of imposts is generally recognized." No person, it is said, "has ever seen any written table of rates, nor are any such written tables believed to exist." The Collector of Durbhanga states that the farmers make as much as they can during the tonure of their lease, and their exactions are passed over unnoticed. The Sub-divisional Officer of Madhubani reports:—"I have found it very difficult to ascertain the truth about them (the imposts), for though I have questioned hundreds of people about them, I have received similar consistent replies from none. No one seems to have a comprehensive knowledge of the whole subject, which appears to be very complicated." The state of affairs on the borders of the Bhagulpore District is described in the following extract from the Collector's report. "He [the farmer of the sayer mehal] says it is possible that some of his sub-lessees may take occasionally more from traders than the fixed duty; but he believes—and I think from all I have heard that he is correct in his belief—that the sub-lessees more frequently take less than the fixed duty to attract traders to their particular roads. Several persons informed me that they can always get redress in the Nepalese Courts if any sayer amlah extorts any sum in excess of the fixed duty; and traders seem to know exactly what the recognized rates are. They say that they always get justice in Nepalese Courts. I asked the farmer who has 'rah-ghats' at only four or five places on the frontier, how it was that traders did not escape duty by crossing the frontier at places where he has no 'rahghats.' He said that he makes arrangements with the villagers all along the frontier, by which they intercept any person going by roads or tracks other than those on which he has 'rah-ghats,' so that very little escapes him."
- Rates of duty at different points on as on exports, and from British as well as from the frontier.

 Nepalese traders, with certain exceptions, which will be noticed further on. As regards the rates of duty, the local officers have furnished them in statements, which will be found among the appendices to this report. An abstract of the information that has been gathered on the subject is given below, district by district.

subject is given below, district by district.

14. Chumparun.—At the 12 toll stations on the frontier of the Chumparun district, duty on animals is levied per head, but in the case of goods, the tax is imposed according to some particular denomination, such as per cart-load, pony or bullock-load, bag, banghy, parcel, maund, &c. The duties levied at Semra Basa

and at Semrown are the same. The rates in force at these two stations are 4 lohia* pice per cart-load, and 2 lohia pice per pony or bullock-load, of the following articles, viz., raw cotton, piece-goods, edible grains, brass and copper utensils, sweetmeats, fish, goor, and tobacco. Such articles, however, as vegetables, spices, and baskets are taxed at 1 lohia pice per shop, but tailors' shops at 2 pice each. The rate for pan or betel-leaves is 2 annas per banghy, and that for pigs 1 lohia pice per head. At Hetaura, 2 lohia pice are levied on each rupee's worth of raw cotton, spices, and tobacco. Of food-grains, murwa is taxed at 2 pice on each rupee's worth, and pulses at Re. 1 per pony or bullock-load. The rate for buffalces is 8 annas per head, for goats 2 lohia pice each, and for piece-goods 2 pice per piece. The duty levied at Bhicha Khori on sheep and goats is 1 lohia pice per head, and that on piece-goods, Indian-corn, cummin-seed, and black pepper 8 annas per cart-load, and 2 annas per pony or bullock-load. At Sirsa-Gudhi horses are taxed at Rs. 5 each, buffalces at 8 annas each, goats and sheep at 8 lohia pice each, and piece-goods

and tobacco at 1 pice and 2 pice respectively on each rupee's worth. In the case of pulses, spices, and attar and rose-water the charges are 8 annas, Re. 1, and Rs. 3 per banghy, respectively. The duty on treasure is Rs. 5 per cent. The rates of impost levied at Ghat Sirsia, Chapkatia, and Mushurwa are uniform, and appear to be more systematic than those prevailing in other ghats. The great bulk of the commodities passing these stations is taxed according to weight in maunds, at rates varying from 1 lohia pice to 6 annas per maund; but as regards rice and oil-seeds, the charges are 3 annas per cart-load, 14 annas per pony or bullock-load, 5 pice per banghy, and 1 pice per bag. The duty on indigo and opium is 8 annas per maund, and that on piece-goods, and hemp, twine and thread 4 annas per 100 maunds. The tax on punga (or sea) salt is \(\frac{1}{2} \) anna, on sandha (or rock) salt \(\frac{1}{2} \) annas, and on sambhar (or Upper Provinces) salt I anna per maund. At Amerputte a charge of 2 annas is made for each bullock, cow, and buffalo, and 1½ lohia pice for a goat. Potatoes are taxed at 6 pice per banghy, 3 annas per cart-load, and 2 pice per parcel; rice at 2 annas per cart-load and 1 annas per pony or bullock-load; and Indian-corn at half an anna per banghy and 2 pice per parcel. The imposts levied at Bhim Phendi on rice, oils, ghee, salt, and saline substances are Re. 1 per cart-load, 4 annas per pony or bullock-load, and 2 annas per bag. Raw cotton also is taxed at these rates, except when carried in bags, in which case there is a reduction of 1 anna per bag. The imposts on piece goods are Re. 1 per cart-load, 8 annas per pony or bullock-load, and I amna per bag. The rates on betel-nuts, undrained sugar, and tobacco are as follows:-

					ioad,	Per pony o	r Im	llock-load.		er b	
			ECN.	۸4,	Р.	Ka.	AS.	. P.	Rs.	A 8	. P.
Betel-nuts (Deccan)		 •••	1	8	0	υ	8	0	0	1	O
Unrefined sugar	•••	 •••		8	0	O	3	()	0	1	0
Tobacco		 • • • •	0	12	()	0	4	0	0	1	0

At Matearwa an impost of 8 annas per cart-load, and 2 annas per pony or bullock-load is levied on raw cotton, Indian-corn, salt, saline substances, undrained sugar, and tobacco. The duty on piece-goods and brass utensils is Re. I per cart-load and 2 annas per pony or bullock-load; on pan or betel-leaves 2 annas per banghy; on vegetables, sweetmeats, garlic, ginger, onions, and baskets I pice per banghy; and on earthenware, fish, and undrained sugar 2 pice per banghy. At Tribeni, a tax of 6 annas per bundle or of Re. I to Re. 1-10 per pony or bullock-load is levied on piece-goods going northward. Sugar, tobacco, and curry-stuffs, of which large quantities are exported to Nepal by this route, are taxed at the rate of one rupee per pony or bullock-load. On exports from Nepal the duties levied at this ghât are as follows:—

Ks. As. P.	ì, B	ls As. P.
Drugs and medicines—	Metals and manufactures of motals-	
Dry ginger (sonth) Per maund 1 0 0 Other medicinal drugs Per rupes worth 0 0 6	Brass utensils Fer rupee worth Iron dato Litto	0 1 0 0 1 6
Fruits, nuts, and vogetables-	Oil-seeds—	•
Oranges Per rupee worth $\begin{pmatrix} 0 & 2 & 0 \\ to & 0 & 0 \end{pmatrix}$		1 12 0
Grain and pulse (Per cart-load 1 & 0	Provisions— (thee Per rupes worth	0 1 B
Rice, husked Per cart-lead 1 4 0 Per pany or bullock-load 0 8 0	Spices-	
Pulse Per pony or bullock-load o 5 0	Bay leaves Per maund	0 A 9

The Sub-Divisional Officer of Bettiah has furnished a schedule shewing the charges made by the Nepal authorities on imports and exports. According to this schedule the scale of imports into Nepal is as follows:—

1	RATE OF	DUTY,
	Per maund.	On value of Articles.
Goats Raw cotton, twist and yarn, piece-goods, turmeric, nuts, gum of the gogul tree, lac, brass utensils, and spices Raw juic, undrained sugar, and tobacco	Rs. a. 1 14 per 100 1 0 ,, maund 1 0 ,, ditto.	10 goats for every 100 goats. Rs. A. 2 12 por cent. Nil.

The following is the tariff for exports:-

No special tax is levied on timber exported, but a royalty of 25 per cent-

is paid on the value of every tree cut down.

The divergence in the rates of duty imposed at the different points on the frontier of the district is, the Collector remarks, "mainly due to the fact that the rates of duty are not fixed by the Nepalese Government, and that the Nepalese

authorities seem to use their discretion as regards the levy of the duty."

Mosufferpore. - The rates of impost levied at the several ghats on the borders of this district vary very considerably, and appear, it is said, to be regulated by custom alone. The duties on imports and exports are equal. The basis of taxation, however, is very much less complicated than that adopted in the Chumparun district, the rates being according as goods are conveyed Cotton piece-goods, food-grains, lac, by cooly, pony or bullock, or cart. brass utensils, ghee, linseed, spices, sugar, and tobacco are charged at Bairagnia and Sonbursa at the rate of 3 lohia pice per pony or bullock-load, and at double that rate when carried by cart. The imposts on these articles at Majorgunge are 4 pice per pony or bullock-load and 8 pice per cart-load, except as regards ghee and spices, the rate on the former article being 2 annas per pony or bullock-load, and 4 annas per cart-load, and on the latter 3 pice and 6 pice, respect-At Bela, the duty on cotton piece-goods, brass utensils, linseed, and spices is the same as at Bairagnia and Sonbursa, but that on food-grains is 2 pice per pony or bullock-load and 4 pice per cart-load. The duty on ghee is comparatively very heavy, namely, 4 annas per pony or bullock-load, and Re. 1 per cart-load. The tax on unmanufactured tobacco is 4 pice per cooly-load. on ponies and mules at Bela is 3 pice per head, on cattle at Sursund 4 annas per head, and on sheep and goats at Bairagnia, Majorgunge, Sonbursa, and Bela 4 pice, 2 pice, 1 pice, and 3 pice respectively. Raw cotton is taxed at 3 pice per pony or bullock-load, and 6 pice per cart-load at Bairagnia, against 4 pice and 2 annas respectively, at Bela. For raw jute the rate at Bairagnia is 3 pice per pony or bullock-load, and 6 pice per cart-load, against 4 pice and 8 pice respectively, in Majorgunge, and 4 pice and 2 annas in Bela. A pony or bullock-load of jute-rope is taxed at 7 pice in Sonbursa, against 4 pice in Bela, but for a cart-load of that article and of sabey grass (a kind of grass from which twine is made) the charge is said to be 10 annas at the former place and only 8 pice at the latter. The duty on vegetables is 6 pice per cart-load at Bairagnia, against 8 pice at Majorgunge, and 2 anuas at Sonbursa. The impost on a cart-load of leather is 4 pice at Majorgunge against 4 annas at Sonbursa. Oils are taxed only at Bairagnia, where the rate is 3 pice per pony or bullock-load, and 6 pice per cart-load. On salt the duty per pony or bullock-load and per cart-load is put down at 3 pice and 6 pice respectively, at Bairagnia and Bela; at 4 pice and 8 pice at Majorgunge; and at 6 pice and 3 pice at Sonbursa. The rate for bamboos is 10 annas per cart-load at Sonbursa and Sursund, against 6 pice at Bairagnia and 8 pice at Bela. Blankets are taxed at 2 pice and one 1 pice per cooly-load in Majorgunge and Bela respectively, against 3 pice per pony, bullock, or cart-load in Sonbursa. The duty on a cart-load of grass is 4 annas at Sursund, 8 pice at Bela, 6 pice at Bairagnia and Sonbursa, and 4 pice at Majorgunge.

16. Durbhunga.—There appear to be three distinct chief forms of taxation

on the borders of this district, viz:

(1) Khurchhappi or kolwali—A tax on exports of grain of about 2 annas a cart.

(2) Sayer—Export duty at varying rates on articles other than grain.

(3) Lag—A duty of 3 pice per rupee on grain sold.

Lag is levied on birta (revenue-free) lands, but in pergunnahs Jhamna and Pakaria, which are in mal (revenue-paying) lands, lag is levied at the rate of 3 pice on each rupee's worth of grain purchased, and a tax of 6 pice per cart-load of grain is levied from the purchasers as kotwali. These taxes are

levied by the sellers, who are also the cultivators, and who themselves work in turn as chowkidars of their villages. They pay a certain sum along with their rent annually to the Durbar for the privilege of levying the above rates. The payment of these rates exempts a trader from payment of any further

khurchhappi at the ghâts.

A similar system to that of Mozufferpore prevails in this district, and the duties are levied by the cooly-load, pony or bullock-load, and cart-load. As regards the import duties, those levied from British subjects on piece-goods are Rs. 5 per cart-load, Rs. 1-4 per pony or bullock-load, and 4 annas per cooly-load, but in the case of nuts, vegetables, salt, and sugar the rate per cart-load is Rs. 1-4, that per pony or bullock-load 5 annas, and that per cooly-load 1 anna. Traders who carry these goods on their heads pay no duty. All these duties are yearly rates, i.e., whon they are once paid the importers get licenses under which they can take goods into Nepal as often as they please within the year. It is said that if a British trader has to import into Nepal once a year, and satisfies the toll officer to this effect, he is charged as follows:—

The export duty on raw cotton is 5 annas per cart-load, 1½ annas per pony or bullock-load, and 2 pice per cooly load; on sabey grass 12 annas per cart-load, and 1½ annas per cooly-load; on ghee and honey 2 annas per banghy; on bay leaves Rs 1-4 per cart-load, and 16 pice per cooly-load; on tobacco Rs. 1-4 per cart-load, and 5 annas per pony or bullock-load; and on wax 16 pice per cooly-load. The duty on food-grains and oil-seeds which is 2 annas per cart-load, and 4 pice per pony or bullock-load, is levied on grain purchased by British subjects only on mâl (revenue-paying) lands.

For purchasing and exporting hides to British India, a certain fixed sum is paid annually to the Durbar. Parrots and other birds are sold at Government golahs, and the purchasers do not pay anything for exporting them. Nothing is charged for exporting timber, which also is sold at Government depôts.

For the exportation of cattle too no rate is levied.

The following list shews the rates said to be levied in parts of Nepal near the outposts of Harlakhi and Lowkahi:—

Near Harlakhi outpost-

```
Grain ... { Per cart load ... 4 lohia pice. 2 ditto. 2 ditto. Tobacco ... , cart or cooly-load ... 4 annas. Cloth ... , pony or bullock-load ... 1 rupec. Ditto in bundles { , cart-load ... 14 annas. ... 14 ditto. Near Lowkahi outpost—

Rice { Per cart-load ... ... 2 anna per rupec of wholesale price besides 2 annas per cart ... 2 anna per rupec of wholesale price, in addition to 1
```

anna per bullock or pony.

The Collector remarks: "The lists vary not only from each other, but also from the information given to me by cartmen, whom I happened to meet at different places on their way either from or into Nepal in respect of the duties levied from them. The rates given by these cartmen are noted in the margin. With a view to acquaint myself more fully on this subject, I applied personally to the Nepal Sooba of Mahatri, Saptari, and Morung districts, but I regret to say that this officer, though he was profuse in his promises, gave me little or no information. All that he told me amounted to this, that 2 pice were charged for each maund of grain in addition to the subject was, if not absolutely nil, at any rate very limited."

The Collector adds: "The lists annexed to this report do not, moreover, agree with those of authorized duties levied in Nepal (pages 15 to 22) circulated by the Bengal Covernment with their letter No. 214P (Political), dated 27th January 1882. The only reason for the variations that I can assign is, that the Nepal Government maintains no regular custom house, and the duties are levied on the farming system. The farmers make as much as they can during the

term of their lease, and their exactions are passed over unnoticed."

Bhagulpore.—A uniform rate of imposts is levied at all the five stations on the frontier of this district. There are as many as 138 articles specified in the tariff list furnished by the Collector, and tax is collected under twelve separate denominations, such as per head, score, maund, seer, banghy, &c. In the majority of cases the import duty is double the export duty. In a few staples, however, the duty on imports and exports is equal, and in about 13 articles the import duty is less than the export duty. On treasure and blankets an export duty only is charged at the rate of 6 pies per tola and 3 pies each respectively, while in the case of food-grains, oil-seeds (except til-seed) and betel-nuts the imports only are taxed. The highest duty (namely be seed) and betel-nuts the imports only are taxed. Rs. 31-4 each) is levied on elephants, whether imported or exported. The export duty on musk is Rs. 2 per seer, and the import duty is half that amount. The import and export duty on a new cart is Rs. 1-4-6. Another article which is heavily taxed is vermilion, the import duty on which is Rs. 1-8, and the export duty 12 annas per maund. For the rest of the articles the rates vary from $1\frac{1}{2}$ pies to 12 annas under imports, and from $1\frac{1}{2}$ pies to 6 annas under exports. As regards food-grains, the import duty on wheat, gram, and pulses is 6 pies per maund; on rice, paddy, murwa, maize, and oats 3 pies per maund; and on the rest 11 pies per maund. The import duty on oil-seeds (except tilseed) is 6 pies per maund, on til the import duty is 12 annas, and the export duty 6 annas per maund. No duty is levied on food-grains or oil-seeds exported from Nepal. The sayer mehal farmer, however, takes 2 annas for every cart laden with rice and other grain when such rice or grain has been purchased in revenue-free villages in Nepal; and the Collector has found that cartmen who bring rice which they have purchased in revenue-paying villages are provided with a pass, in which it is stated that the vendor has levied "koyali" (a fee for weighing the grain), and that the amlah of the rah-ghats are to let the cartmen pass without molestation. The Collector questioned numbers of these cartmen, and they all said that the farmer's amlah never take anything from them when they hold these passes. The import duty on betel-nuts is 1½ annas per maund.

The import duty on horses is 8 annas, and the export duty 4 annas, for every Rs. 100 of value. The tax on each buffalo imported is 8 annas, and on each exported 4 annas. Formerly 10 annas per head was charged on all full grown cattle bought in Nepal and 5 annas per head on calves, but now no charge is made. The late Sir Jung Bahadoor abolished the sayer duties on sale of cattle, but in revenue-free villages the lakhirajdars still charge sayer dues. Whether imported or exported, the duty levied on pigs and goats is 6 pies per head, on hawks 7 annas each, and on fowls and talking birds 1½

pies each.

Of the other articles, those on which the import and export duties are equal are hides (1½ pies per pieco), umbrellas (3 pies each), earthenware (8 pies per banghy), mats (9 pies per maund), til (medicinal) and ghee (1 anna per seer), safflower and string (1½ annas per maund), scabbards of swords (3 annas per score), and charas (4 annas per Rs. 100 worth). The articles on which the import duty is less than the export duty are shown in the following statement:—

									Rat	er.								R.	ates.

Besides these articles, hookas (cocoanut bowls) are taxed at 9 pies per maund under imports and 3 pies under exports; and gunnies at 9 pies and 3 pies per piece, respectively. The import and export duties levied on a maund of unmanufactured tobacco are 1 anna and 9 pies respectively, while those for manufactured tobacco are 2 annas and 6 pies, respectively. For dried dates 9 annas per maund are charged on imports, and 6 annas on exports.

18. Purneah.—The duties levied in the Morung district of Nepal on the frontier of the Purneah district, were published by the Government of Bengal in January 1882. The Collector reports that there has been no change since then in the rate of duties. For facility of reference an abstract of the old schedule is appended. The duties levied on all articles of trade are shewn under the following heads:—

(1) Taken at chowkies.

(2) Taken from shopkeepers at hats or markets.

(3) Nekasi or export duties taken by ijaradars, or contractors or farmers, from persons purchasing things on market days.

(4) Tangiana or export duty taken by a sayerdar or farmer according to labra kattha* within his sayer mehal.

(5) Chadhti or import duties taken at fairs at Barahchhetra.

As regards (1), the imposts are levied per head in the case of living animals; ad valorem in that of arms; and per maund in that of raw cotton, hemp rope, oranges, potatoes, food-grains, iron, parched rice, salt, spices, sugar, and tobacco; piece-goods are taxed by the piece; earthen-ware, vegetables, fish, and meat per cooly-load; oils per seer; and mats according to number. The rates of duty range from \(\frac{3}{4}\) pie in British money to 7\frac{1}{4}\) annas. Except in the case of fish and unmanufactured tobacco, the import duty is double the export duty. There is no export duty on buffaloes—female and young—but the import duty amounts to 3 annas 3 pies, and 4 annas each respectively. The highest import duty is charged on betelnuts (7 annas 6 pies per maund); next come guns, pistols, daggers, and shields with a duty of 6 annas 3 pies per cent. ad valorem; undrained sugar is taxed at 3 annas 3 pies

per maund. The import duty on salt is 8 annas per maund; on manufactured and unmanufactured tobacco 2 annas 6 pies, and 2 annas 5 pies per maund respectively; on raw cotton, hemp rope, pulses, and parched rice (cheera) 2 annas per maund. The remaining articles, of which there are 15 on the list, are

unimportant. Their rates vary from 11 pies to 1 anna 9 pies.

As regards (2) the tax (import is levied per shop, but cloth and haber-dashery shops have to pay 3 pies per rupee's worth of articles. Sellers of madder or manjit, and oils have to pay I anna per shop. Pan, iron, salt, and mustard seed shops are charged at 9 pies per shop. Dealers in hill fish are taxed at 71 pies per shop, while those who sell fresh fish, spices, tobacco, and earthen pots pay a duty of 6 pies per shop. Sellers of miscellaneous drugs and medicines and curds are charged $4\frac{1}{2}$ pies per shop. A duty of 3 pies per shop is levied from the vendors of raw cotton, ginger, earthenware, hemp and flax, oranges, plantains, jack fruit, potatoes, brinjals, radishes, pulses, country spirits, sugarcane, and gold and silver ornaments. On spears, turmeric, miscellaneous vegetables, murwa, Indian corn, confectionery, flour, eggs, and chunam shops the tax is 1½ pies per shop; and on curdled-milk and butter-milk shops three-fourths of a pie per shop.

The highest duty levied under head (3) is 10 ann is, and the lowest rate three-fourths of a pie. On living animals, the export duty on pony marcs and female buffaloes is 8 annas per head, while that on male buffaloes, cows (calves), pigs, goats, and ducks is 4 annas, 1 anna, 6 pies, 3 pies, 1½ pies, and three fourths of a pie respectively per head. The expert duty on raw cotton is 1 anna per maund; on piece-goods and oranges 3 and 6 pies per rupee's worth respectively; on rice, paddy, and pulses 9 pies, 6 pies, and 1 anna per maund respectively; and on mats three-fourths of a pie each; the duty on curd is I anna per coolyload, and on mustard seed 6 pies per maund. No import duty is levied on the articles of trade specified above. On the following articles, however, duty is levied on imports as well as on exports, the rate under the former head

being double that under the latter:—

Names of a	rticles		mpo dutz			tp(1 uty	rt	Names of articles		npo luty			кро .(1)	rt

Whether imported or exported, the duty on earthenware is 6 pies per coolyload, and on gold, I anna per tola. The import duty on rose-water is three-fourths of a pie per seer; in the case of trumpets the import duty is 3 annas against an export duty of 6 annas.

The rates given under head (4) and detailed below, shew the export duty on living animals (except ducks and pigeons) to be twice the import

duty.

N		Import duty	l Fxpert duty	Names of animals	Imp rt duty	l'aport duis
Names of animals		HS AS	P Rs As P		Ra as r	Rs Ab I
Elephants Heny mazes Buffaloes (female) Diffe (without calves)	ench do do, do	6 8 0 5 0 5	0 13 0 0 0 0 10 0 3 0 10 6 6 0 9 0	Ruffalors (with calves) cach cows a Pier d Courts d Courts do	0 2 3 0 2 0 0 0 6 0 0 3	0 4 6 0 4 0 0 1 0 0 0 6

An export duty of 7 annas per maund is charged on raw cotton; 9 pies on hemp and flax, wheat, pulses, and rice, while 41 pies are charged on paddy, and I anna 3 pies on mustard seed and linseed. No import duty is charged on any of these articles. The export duty levied from paddy-cutters going from British territory into Nepal is 2 annas per sickle.

The rates of duty shewn under the last head (5) vary from 3 pies to Rs. 3-4-6. The living animals and articles on which an import duty only is charged are ducks (12 pies per cooly-load), old falcons (10 annas cach), 10 al falcons (Rs. 2-8 each); hawks (Rs. 1-10 each); cotton twist and yarn (Re. 1 per cart load, 4 annas per pony or bullock-load, and 2 annas per cooly-load); red lead (4 annas per pony or bullock-load, and 2 annas per cooly-load); salt (Re. 1 per cart-load, 4 annas per pony or bullock-load, and 2 annas per cooly-load); cheera or parched rice (3½ annas per maund); and dried fish (4 annas per cooly-load). On the other hand, export duty only is levied on the following articles:—Axes, hatchets, &c. (1 anna each), khookries or Nepal knives (3 pics each), jimbu (Thibet grass used as spice, 2½ annas per maund), Bhutia blankets (1 anna each), and bag-nets, lamps and stands, and darka cloth (a kind of duri, 3 pies each.) The articles on which the taxes on imports and exports are equal, are raw cotton (1 anna 6 pies per maund), oranges (1 anna 3 pies per 100), gum of the gogul tree (6 pies per maund), and paper (3½ pies per 200 sheets). The charge made on the imports of hill chrpusi (chintz) amounts to Rs. 3 per cart-load, and Re. 1 per bullock or pony-load, but the duty on exports is levied at the latter rate, only. The import duty on cummin-seed, pepper, betelmuts from Bengal, and drained sugar is Re. 1 per cart-load, 4 annas per pony or bullock-load, 2 annas per cooly-load, and 2 annas 6 pies per maund, but the duty on the export trade is only 1 anna 3 pies per maund. Under undrained sugar the import duty per load is the same as on the above four articles, but per maund it is 9 pies, while the export duty is only 4½ pies per maund. On preserved fruits the import duty is 3 annas 9 pies per maund, and the export duty 1 anna 9 pies. The following statement shews all the staples on which the import duty is double the export duty:—

The import duty on aconite is 5 annas a maund against an export duty of 6 annas. On confectionery, the tax on imports amounts to Rs. 2 per cart-load, and Ro. 1 per pony, bullock, or cooly-load, and that on exports to Re. 1 per cart, pony or bullock-load, and 6 annas per cooly-load.

19. Darjeeling.—On the frontier of the district the imposts levied at the four

19. Darjeeling.—On the frontier of the district the imposts levied at the four stations in the Nepal Terai and at the five stations on the hills vary considerably. A load of raw cotton imported into Nepal from British territory is charged at 4

annas in the hills, against only 3 pies in the Terai. Iron and other metals (except brass and copper), paints and colours, spices, and sugar (drained and undrained) are all taxed at 8 annas per load in the hills, against 3 pies per load in the Terai. Iron is passed free in the Terai. In the hills, cotton twist and yarn, both European and Indian, are taxed at 4 annas per load, while the duty on a load of piece-goods, whether European or Indian, is 2 annas. In the Terai, however, a uniform rate of 3 pies a load is charged on both these descriptions of cotton manufacture. The imposts on turmerie, food-grains, oils, linseed, manufactures of silk, betelnuts, and tobacco is 4 annas per load in the hills against 3 pies at the other places. On wheat, rice, paddy, oils, linseed, and tobacco, no charge is made in the Terai. The tax on salt at the hill stations is 2 annas per load, and that on vegetables brass and copper 1 anna per load. The duty on manufactured woollen goods is only 1 anna at Mamringtar, against 2 annas at Bundooka, Goorkhajagat, and Feekul, and 8 annas at all the four stations in the Terai.

As regards the duties levied on goods exported from Nepal, the rates are equal at all the four stations in the Nepal Terai, while of the five hill stations the rates at four of them, viz., Mamringtar, Bundooka, Goorkhajagat, and Feckul are identical Monglong alone has a tariff of its own. Buffaloos and horses are taxed in the Terai at 10 annas and 5 annas per head respectively, against 8 annas per head at the hill stations, except at Monglong, where the taxes are 12 annas and Rs. 2-8 per head respectively. The charge on sheep and goats is 2 annas per head in the hills, and 6 pies in the Terai. For poultry 4 annas are taken at Monglong, 6 pies at the other four hill stations, and 3 pies in the Terai. highest duty levied in the hills is on brass and copper, namely, Rs. 28 per cooly-load. In the Terai the rate is 1 anna per pony or bullock-load and 2 annas per cooly-load. At Monglong iron is taxed at Re. 1-8 per cooly load. against Rc. 1 at the other hill stations, and in the Terai at 1 anna per pony or bullock-load, and 2 annas per cooly-load. Spices are taxed at 8 annas per coolyload at the hill stations, except at Monglong, where the rate is 2 annas: at the four stations in the Terai the tax is 1 anna per pony or bullock-load and 2 annas per cooly-load. A charge of 4 annas per cooly-load is made in the hills on chiretta and mudder, against 2 annas per cooly-load in the Terai. For ghee 8 annas per cooly-load is charged at Monglong, against 4 annas at the other hill stations and 1 anna in the Terai. The duty on tobacco is 4 annas per cooly-load in the hills, while in the Terai it is 1 anna per pony or bullock-load, and 2 annas per cooly-load. No duty is levied in the hills on Indian twist and yarn, raw jute, and gurmy-bags, but the imposts on these articles in the Terai are 1 anna per pony or bullock-load, and 2 annas per cooly-load. European piece-goods when brought back to British territory from Nepal are charged at 2 annas per cooly-load in the hills, but no tax is levied on them in the Terai. For Indian piece-goods, dealers have to pay Rs. 1-8 per cooly-load at Monglong, 2 annas at the other four stations in the hills, and the usual rates of 1 anna and 2 annas in the Terai. Dealers in the hills, and the usual rates of 1 anna and 2 annas in the Terai. Dealers in food-grains are taxed at the rate of 2 annas per cooly-load at the hill stations, except at Monglong, where the tax on pulses and rice is 4 annas. while in the Terai pulses are charged at 2 annas per cooly-load, and rice and paddy at 1 anna per rupee's worth. The imposts levied on hides of cattle and linseed are 1 anna per pony-load in the Terai. Nothing is charged on them at the hill stations. The tax on skins of sheep, goats, and other small animals is 6 pies per cooly-load in the hills, whereas in the Terai it is 1 anna per pony or bullock-load, and 2 annas per cooly-load. Mustard and other oil-seeds are taxed at 2 annas per cooly-load in the hills, against the usual rates of 1 anna and 2 annas in the Terai. For vegetables, the rate of duty at Monglong is 2 annas per cooly-load against 1 anna 4 pies at the other four stations in the hills, and 1 anna and 2 annas in the Terai. The duty on timber ranges from Rs. 1-4 to Rs. 1-12 per cart-load in the Terai, but it is passed free at the hill stations. The tax on manufactured woollen-goods is 2 annas per cooly-load in the hills, and 8 annas in the Torai.

Mr. Oldham, the present Deputy Commissioner, writes:

[&]quot;Mr. Wace contemplated submitting comparative statements for the duties levied at all the registering posts on the frontier, thus showing at a glance the different rates that pre-

vail in different parts, but was unable to do so. Thus, for instance, cotton (raw), which is taxed at I anna per manad in the Parsa District of Nepal, is taxed at I anna 6 pies per load in the Saptari District of Nepal east of Bhagulpore. Similarly, safflower, which is taxed at 2 annas 6 pies per manad in the Parsa District, is taxed at 6 annas 3 pies per hundred rupees of purchase money in the Sarlahi District of Nepal north of Tirhoot, and 3 pies per load in the Darjeeling District. The difference in the amount of taxation and the vagueness of such a basis as a load or as purchase money made any useful comparative statement impossible."

- 20. The information regarding the rates of duty levied from British and Nepalese subjects is summarized below. The Imposts levied on British and Collector of Chumparun writes: "So far as I can gather, no taxes are imposed on Nepalese traders in passing the frontier. The Sub-divisional Officer of Bettiah when in camp during the cold weather, learnt from some Nepalese traders on their way to Bettiah with grain, that they paid no tax in passing the frontier, but that British subjects pay a tax of 10 pice (Dhabua), i.e., 1½ annas for each cart-load of grain brought across the frontier." The royalty on timber is paid by Nepalese and British subjects alike. The Collector of Mozufferpore states that the imposts are paid both by British and Nepalese subjects, but that Nepalese subjects pay only half the rates levied from British subjects.
- 21. The Sub-divisional Officer of Madhubani in the Durbhunga district reports:—
- "There is a difference in the taxation of exporters resident in Nepal and resident in India. The traders of the first class have not to pay anything to enable them to bring their goods to India, if they purchase their merchandise in mal lands, while, if they purchase in birta lands, the owners of the birta (lakhiraj or revenue-free) lands charge them three lohia pice per rupee worth of grain purchased. On payment of the above rate, the traders get a pass which protects them anywhere they go, but if the traders be residents of birta lands they are not charged anything for purchasing in birta lands. The above refers only to grain, and is levied in the spot under the name of lag. Lag is levied by the villagers, who pay the Nepal Government fixed annual sums in consequence, which are added to their rental."

22. The Collector of Bhagulpore writes:-

- "It will be observed that the farmer is not allowed to levy duty on food-grain or oil-seed exported from Nepal; and the reason for this is that the Nepal Government levy from every cultivator a cess called 'koyali,' which is exactly the same as the illegal cess known by that name which the zemindars in many parts of this and other British districts levy from their ryots. The ryot when he sells his grain, gots from the purchaser a fee for weighing the grain, and a certain proportion of this fee is, by custom, considered to be due to the zemindar In Nepal this 'koyali' is recognized by Government, and it is generally taken by the ryots from the purchasers of their produce. Some Nepalese cultivators take one, some two, "lohia" pice per rupee of value of grain sold; some take no 'koyali' at all from old customers. It is not an export duty levied at the ghâts on the frontier, but is a fee taken at the place where the grain is weighed out and sold, and is levied not only from British subjects who go into Nepal to buy, but from all purchasers whether they are subjects of the Nepal or of any other Government. It is therefore in no way an export duty, as has apparently been represented by officers of other districts.
- "British subjects who take pieco-goods, salt, tobacco, brass utensils, &c., into Nepal to soll at hats or fairs have to pay no duty at the "ghâts," but they pay market dues either to the sayer farmer's men or to his sub-lessess in revenue-paying villages, or to the lakhirajdar's men in revenue-free villages. If they take rice or other grain, instead of money, as price of articles sold, they can bring such grain across the frontier without being charged duty. If, however, they purchase grain, they have to pay 'koyali' to the vendors, provided that they purchase elsewhere than at markets; in the latter case they pay the person entitled to market dues.
- "British subjects who bring 'sabey' grass from Nepal have not got to pay export duty, but they have to pay 'sayer' in the same way that Nepalese purchasers of 'sabey' would have to pay at the places where they get the 'sabey.' This then again is not an export duty; the purchaser whether he exports it from Nepal or not has to pay four annas for each cooly-load of 'sabey,' and once this is paid the 'sabey' can be brought away either in a cart or on pack-bullocks, or on ponies, or in any other way, and no further charge is made at the 'ghâts.'
- "British subjects who have shops in Nepalese towns are never charged import duty on goods brought into Nepal for sale at their shops. All they have to pay is ground rent for their shops."

- 23. The Deputy Commissioner of Darjeeling states that the imposts levied in the Nepel Terai are paid by all traders alike, whether British, foreign, or Nepalese subjects.
- Mow far the fluctuations in the are the results of variations in the rates of duty at the results of variations in the different posts, the Collector of Mozufferpore reports that "fluctuations in imports and exports are not the result of variations in the rates of duty levied at different points. The rates of duty are not as a rule subject to variation, though those levied at one place differ widely from those levied at another. The places where the traffic is greatest are those at which the highest rates are levied; for example at Majorgunge the rates are much higher than at Bela. At the same time there can, of course, be no doubt whatever that the levy of these imposts constitutes a serious obstacle to trade."
- 25. The Collector of Durbhunga offers the following remarks upon the subject:--
- "In the face of the discrepancies that have come to light, it is difficult to say with any certainty that the fluctuations in the exports and imports, as registered at the different registering posts, are governed by the variation in the incidence of taxation along the different routes. Traders naturally choose such routes as best suit their convenience, costs of carriage, taxation, price charged or given for commodities, all being taken into consideration. Mr. Faulder, the Sub-divisional Officer of Madhubunny, says.—'I believe the traders do not choose their route according to the dues levied, finding them higher in one place than another. They follow from year to year the particular road to which they heard their fathers have been accustomed for years, and they know nothing of the other routes.'"
 - •26. From Bhagulpore the Collector reports:—
- "As to difference of rates of duty in different districts, it is said that Jung Bahadoor fixed these according to the amount of traffic, consulting the farmers. On the whole I am inclined to believe that the difference in rates has very little to do with the fluctuations in the amount of traffic at different places. The amount of traffic depends more on the demand for different articles in different places. The roads in Nepal are very bad; they are in fact mere tracks with deep ruts, but all are equally bad. The roads in the Scopole sub-division, which borders on Nepal, are second to none in the country; they are perfect in spite of the heavy traffic"
- 27. The Deputy Commissioner of Darjeeling is also of opinion that "the fluctuations in the quantities of imports and exports at the different registering posts on the frontier do not depend upon the rates levied at different points."
- 28. The amount of untaxed foreign salt sent into British territory from Import of untaxed foreign salt from trans-Himalayan sources showed a decrease of trans-Himalayan sources.

 387 maunds 23 seers as compared with 1882-83, and of 799 maunds 8 seers and 8 chuttacks as compared with 1881-82. The details of this traffic are as follows:—

				1881-8:			1882-83.		1885-84.
	•			Mds. s	. (c.	Mds. s.	c.	Mds. s. c.

									-
		Total	•••	1,932	8	8	1,520 23	0	1,133 0 0

It will be seen that the imports into the Darjeeling district were 24.26 and 41.27 per cent. below the figures of the two previous years, respectively. The consumers of this salt are principally Nepalese, Bhutias, and Lepchas. The Deputy Commissioner of Darjeeling observes that the "facilities of transport allowed by the Darjeeling-Himalayan Railway and the reduction in duty on the duty-paid salt from the plains appear to account for the decrease, and promise to reduce the imports now reported to a minimum." The

following statement shows the principal places from which the supply was imported during the year 1883-84:—

Names of Re	gistering Stat	lions.	Quantity imported during 1883-84.	From what places imported.
Kurjulia Rungeet Pheydong Goompahar	 Total	***	Mds. 8. 65 2 267 10 431 0 350 8	Principally from Waloong Chong and Takpay in Nepal. From Sikkim. Principally from Thibet; a small quantity from Sikkim and Bhootan. From Walang Chongola in Nepal.

The falling off in the imports of this salt in the Julpigoree district was 60 per cent. as compared with the preceding year, and 42 86 per cent. as compared with 1881-82. The Deputy Commissioner can assign no special reason for these fluctuations.

TRADE OF BENGAL WITH NEPAL.

29. The trade of Bengal with Nepal is intercepted by a cordon of stations, of which there are 27, on all the principal lines of traffic between Chumparun at one end, and Darjeeling at the other. All these stations were kept open throughout the year, with the exception of Tribeni Ghât, in Chumparun, and Nuxarbaree, Goompahar, and Kurjulia in Darjeeling. Tribeni Ghât station was closed for two months (September and October), and Kurjulia for three months (16th June to 15th September) of the year. On the recommendation of the Magistrate of Purneah, orders have been given for the removal of the three existing frontier registering stations in the Kishengunge sub-division from Digalbank, Byreah, and Kalooghat to Panthamari, Dhoorsa, and Teragutch, and of the Kuari (Meghahat) station in the Arrareah sub-division to Nowabgunge.

30. The total value of the trade registered during the year 1883-84 as compared with the figures of the two previous years, was as follows:—

Years.				Imports from Nepal.	Exports to Deput.	Grand total.
				Rs.	$\mathbf{Rs.}$	Rs.
1881-82	•••	•••		75,42,743	55,36,668	1,30,79,411
1882-83	•••		•••	75,60,604	5 5, 5 7 ,5≵5	1,31,18,129
1883-84	*4 *	•••		71,76,943	64,53,680	1,36,30,623

The gross value of the trade shows an increase of 3.93 and 4.23 per cent. as compared with the totals of the years 1882-83 and 1881-82, respectively. Under imports there is a decrease of 5.07 and 4.85 per cent., but as regards the exports, the figures indicate an increase of 16.18 and 16.62 per cent. The chief staples which show an improvement over the trade of the previous year, are cotton piece-goods (Rs. 4,06,019), precious stones and pearls, unset, (Rs. 3,57,731), miscellaneous rain crops (47,273 maunds), linseed (41,313 maunds), salt (18,330 maunds), provisions other than ghee (13,383 maunds), tobacco (10,406 maunds), saltpetre (8,647 maunds), iron (7,651 maunds), brass and copper (7,426 maunds), undrained sugar (6,921 maunds), and opium (238 maunds); and the articles in which the largest decrease occurred are rice (3,21,755 maunds), paddy (1,13,670 maunds), miscellaneous spring crops (20,909 maunds), timber (1,83,841 maunds), mustard seed (18,113 maunds), hides (11,953 pieces), skins of sheep, &c, (17,478 pieces), and woollen goods (Rs. 67,680).

31. The principal staples comprised in the import and export traffic during the past three years, are exhibited in the following statement. The figures shown here, however, represent the net traffic between Bengal and Nepal, after

deducting such portions of it as passed into, and from, other provinces through Bengal:—

^{32.} Cattle.—The cattle trade showed on increase of 6,953 head as compared with 1882-83, and of 2,355 head as compared with 1881-82. The figure under imports are 25,277, of which 8,041 were sent into Chumparun, 7,63

into Mozufferpore, 5,972 into Purneah, and the remainder, 3,629, into other districts.

- 33. Cotton, raw.—The trade during the year in this staple was 8,862 maunds against 9,767 maunds in 1882-83, and 7,494 maunds in 1881-82. The total quantity exported to Nepal was 8,069 maunds, of which 6,741 maunds were drawn from Chumparun, 521 maunds from Purneah, and the rest from the other frontier districts of Behar.
- 34 Cotton piece-goods.—The traffic in European piece-goods showed a great improvement. The total value of the different sorts of these goods exported to Nepal during the year was Rs. 21,35,246, being Rs. 3,15,654 in excess of thre figures of 1882-83 and Rs. 3,00,428 in excess of those of 1881-82. In the case of Indian piece-goods, the exports showed an increase of Rs. 69,491 and Rs. 14,856 as compared with the figures of 1882-83 and 1881-82, respectively. The following statement shows the exports of European piece-goods registered at the different stations during the past three years:—

There was a considerable falling off in the import trade during the past year, the total quantity amounting to 15,45,390 maunds against 19,48,355 maunds in 1882-83, and 16,77,657 maunds in 1881-82. The Collector of Chumparun writes—"Owing to the shortness of the aughani harvest and disturbances with Thibet, the export of grain from Nepal was stopped for some time. A Chunpatia mahajun, who cultivates land in Nepal, complained to the Sub-Divisional Officer of Bettiah that he was not allowed to export his own grain." The following statement shows the total quantity of foodgrains imported through each registering post, district by district, during each of the past three years:—

36. Hides.—The figures of the import traffic for the past year show a decrease of 11,957 pieces as compared with 1882-83, but an increase of 20,802 pieces as compared with 1881-82. The subjoined statement gives the names of the different stations where the largest number of hides was registered during the three years:—

37. Skins of sheep, goals, and other small animals.—The total imports under this head amounted to 50,275 pieces against 67,454 pieces in 1882-83, and 47,709 pieces in 1881-82; out of the year's imports, 44,466 pieces were registered at Bairagnia in the Mozufferpore district.

38. Brass and Copper, and their manufactures.—This trade is steadily increasing. The quantity exported to Nepal during the year was 19,541 maunds, valued at Rs. 7,81,640, against 12,323 maunds, valued at Rs. 4,92,920, in 1882-83, and 8,707 maunds, valued at Rs. 3,48,280, in 1881-82. Of the year's

supply, 16,253 maunds were exported via the Chumparun district.

39. Ghee.—The import trade showed a decrease of 3,113 maunds on the returns of 1882-83, and an increase of 1,358 maunds as compared with 1881-82. The principal registering posts through which the consignments were sent from Nepal are as follows:—

- 40. All other kinds of previsions.—The total traffic amounted to 79,193 maunds against 65,810 maunds in 1882-83, and 1,01,037 maunds in 1881-82. As compared with 1882-83, the import trade showed an increase of 2,065 maunds, and the export trade of 11,318 maunds. The great bulk of the imports was registered on the frontier of the Purneah district, but as regards the exports, the largest supply, amounting to 26,547 maunds, was sent to Nepal through Chumparun; Purneah exported 12,066 maunds and other stations 5,598 maunds.
- 41. Salt.—The large increase in the amount of salt carried to Nepal is specially noticeable, the total quantity being 97,427 maunds against 79,260 maunds in 1882-83, and 81,450 maunds in 1881-82. The different registering posts through which salt was carried to that State during the past three years, are shown in the following statement:—

42. Saltpetre.—There was a great recovery in the import trade, the total quantity having amounted to 14,521 maunds against 5,985 maunds in 1882-83, and 12,911 maunds in 1881-82. The principal districts to which saltpetre was consigned in large quantities were Mozufferpore (7,525 maunds), Durbhunga (4,297 maunds) and Chumparun (2,699 maunds).

43. Oilseeds.—The total quantity of linseed imported into British territory was 41,341 maunds in excess of the imports of 1882-83, and 1,09,778 maunds over those of 1881-82, but under mustard seed, the figures fell off from 81,373 maunds in 1881-82, to 71,150 maunds in 1882-83, and 52,802 maunds

in 1883-64. The different stations through which these supplies were sent during the past three years, are as follows:—

- 44. Silk, manufactured.—The value of manufactured silk exported to Nepal was Rs. 98,383 against Rs. 1,12,867 in 1882-83, and Rs. 52,555 in 1881-82. The statistics of the frontier post of Kutkenwa in Chumparun show that as much as Rs. 81,000 worth of the goods exported during the year were sent to Nepal by that route.
- 45. Sugar.—The total quantity of drained sugar sent to Nepal was 7,785 maunds against 4,975 maunds in 1882-83, and 5,314 maunds in 1881-82, while the supply of undrained sugar rose from 20,429 maunds in 1881-82 to 20,869 maunds in 1882-83, and 27,786 maunds in 1883-84. Of the exporting districts Chumparun contributed 3,933 maunds of drained and 11,035 maunds of undrained sugar; Mozufferpore 1,145 maunds of drained and 3,587 maunds of undrained sugar, and Durbhunga 637 maunds of drained and 6,069 maunds of undrained sugar.
- 46. Tobacco.—The total weight of tobacco registered was 40,004 maunds against 29,598 maunds in 1882-83, and 29,787 maunds in 1881-82. The increase in the import trade was 3,891 maunds as compared with the previous year, and in the export trade 6,515 maunds. Of the importing districts, Purneah received 3,612 maunds, Mozufferpore 2,686 maunds, and Durbhunga 1,192 maunds, while as regards the exports, the largest supply was sent from Mozufferpore (13,360 maunds) and Chumparun (13,018 maunds).
- 47. Timber.—The timber trade showed a falling off of 1,83,841 maunds as compared with 1882-83, and of 76,083 maunds as compared with 1881-82. The principal registering posts through which these supplies were imported from Nepal are:—

STATIONS.			In what district.		1881-82. Mds.	1882-83. Mds.	1883-84. Mds.
Kutkenwa Tribeni Ghat Ruxoul Ghorasan Mirgungo Other routes	•••	•••	Chumparun Ditto Ditto Ditto Purneah	•••	66,099 86,253 21,073 1,424 10,411 95,722	1,21,881 1,68,640 35,314 5,074 13,876 43,955	55,336 42,350 38,175 34,000 10,687 24,351
			Total	•••	2,80,982	3,88,740	2,04,898

48. Wool, manufactured.—The total value of the export trade of the past year showed a decrease of Rs. 67,909 as compared with 1882-83, but it exceeded the figures of 1881-82 by Rs. 51,614. The great bulk of these supplies was carried to Nepal by the routes passing through the Chumparun district.

TRADE BETWEEN BENGAL AND SIKKIM.

49. As heretofore, the registration of the trade of Bengal with Sikkim and Thibet was effected at Pheydong and Rungeet in the Darjeeling district. Both these stations were kept open throughout the year. Generally speaking, the traffic intercepted at the former post is that which goes to, and comes from, Thibet, while that recorded at the latter station belongs to Sikkim proper.

50. The total value of the trade registered during the past three years,

is shown below:-

Years.			Imports from · · Sikkim,	Exports to Sikkim,	Total.
			${f R}s.$	Rs.	$\mathbf{R}\mathbf{s}$.
1891-82		***	 1,67,533	86,011	2,53,544
1882-83	***		 2,00,148	1,16,294	3,16,442
1883-84			 2,21,523	1,12,711	3,34,234

The advance in the aggregate value of goods registered was Rs. 17,792 or 5.62 per cent. as compared with the previous year, and Rs. 80,690 or 31.82 per cent. as compared with 1881-82. The improvement was mainly in the import trade, the most noticeable items which contributed to the increase in the year's traffic as compared with 1882-8. being raw wool, miscellaneous rain crops, foreign tea, horses, provisions, spices, gram, and shell-lac. The export trade, however, would appear from the returns to have remained almost stationary, a falling off being shown in the traffic in indigo, cotton piece-goods (European), other metals, cattle, and iron, and an increase appearing under tobacco, woollen goods, paints and colours, cotton piece-goods (Indian), brass, provisions, oils, and dyeing materials.

oils, and dyeing materials.

51. The following statement shows the total value of each of the important articles of the import traffic as registered during the past three

years:--

52. The imports of hill ponies through Pheydong showed a small increase during the past year, the total number being 683 against 662 in 1882-83, and 636 in 1881-82. The recorded cattle trade fell off by 65 head as compared with the previous year, and by 26 as compared with 1881-82. There was a decrease of 23.26 per cent. under sheep and goats on the returns of 1882-83, but an increase of 17.46 per cent. is shown on comparison with those of 1881-82. The figures under lime and limestone showed a great improvement during the year, the total quantity being 6,051 maunds against 1,897 maunds in 1882-83, and 3,179 maunds in 1881-82. The supply of miscellaneous rain crops is steadily increasing, the total quantity during the year showing an advance of 4,009 maunds on the trade of 1882-83, and of 10,597 maunds on that of

1881-82. This is all registered at Rungeet. The number of hides registered was 751 pieces against 760 pieces in 1882-83, and only 106 pieces in 1881-82. The quantity of shell-lac rose from 2 maunds in 1881-82 to 9 maunds in 1882-83, and naunds in 1883-84. Brass and copper showed a decrease of 90 maunds as with pared with the total of the previous year, and of 343 maunds on the figures of 381.82. The amount of ghee registered was 96 maunds against 141 the parks in 1882-83, and 111 maunds in 1881-82. All other kinds of provisions, nowever, showed an increase, the figures for the past year amounting to 71 mainds against 34 mainds in 1882-83. The quantity of untaxed foreign salt fell off from 1,779 maunds in 1881-82 to 791 maunds in 1882-83 and 606 maunds in 1883-84. It is believed that a further decrease will take place, if indeed the import of this article is not entirely extinguished, as recent enquiries have shown that duty-paying salt is consumed at places in Sikkim four marches from Darjeeling. The traffic in spices was active, the quantity imported being 239 maunds against 159 maunds in 1882-83 and 119 maunds in 1881-82. The quantity of the brick tea of Thibet imported during the year was 77 maunds against 42 maunds in 1882-83, and 64 maunds in 1881-82. The Deputy Commissioner of Darjeeling has recently received a few samples of tea manufactured after this method in British territory by Messrs. Cresswell and Company, and he has been directed by the Government of Bengal to facilitate its sale in those markets of his district which are most frequented by Thibetan traders. An allotment of Rs. 100 has been sanctioned for the purpose of paying commission to the shop-keepers who may be entrusted with the sale of the tea. In the last report it was pointed out that one of the most satisfactory features in the trade of that year was the beginning of a steady import of wool, of which there is an unlimited supply of excellent quality within a few days' journey from Darjeeling. The result of the registration during 1883-84 shows that so much as 911 maunds of this article were sent into British territory against only 168 maunds in the preceding year, while in 1881-82 no traffic was returned under this head. It is Lelieved, however, that the wool trade has dwindled during the current year, partly owing to the difficulties placed in the way of traders by the Tibetan There was a slight decrease in the value of manufactured frontier officials. woollen goods (chiefly blankets), but the figures are still in advance of those of 1881-82 by Rs. 13,231. The imports under "all other articles of merchandise, manufactured" showed an increase of over 111 and 154 per cent. on the figures of the preceding two years. The following statement illustrates the fluctuations of traffic in all the important staples of import registered at each of the stations of Rungeet and Pheydong during 1883-84, as compared with the figures of 1882-83:-

Imports into British Territory.

There was a slight decrease of 5.77 per cent. in the value of piece-goods registered as exported during the past year as compared with 1882-83, but when compared with the figures of 1881-82, a large increase of 46.54 per cent. is observed. Similarly, indigo shows a falling off of 44 maunds on the returns of the previous year, and an increase of 35 maunds on those of 1881-82. ports of miscellaneous dyeing materials rose from 26 maunds in 1881-82 to 79 maunds in 1882-83, and 85 maunds in 1883-84. The aggregate total of metals registered as exported was 408 maunds, showing a decrease of 154 maunds on the returns of 1882-83, and an increase of 143 maunds on those of 1891-82. The exports of oils rose during the year to 110 maunds against 61 maunds in 1882-83. The advance under paints and colours was 21 and 3 maunds in 1881-82. maunds, and in provisions 38 maunds as compared with the previous year. The total quantity of salt was 392 maunds against 265 maunds in 1882-83, and There has been a considerable increase under tobacco, 173 maunds in 1881-82. the exports registered during the year amounting to 2,331 maunds against 1,487 maunds in 1882-83, and 709 maunds in 1881-82. The following comparative statement shows the amount of the export traffic registered at each of the registering posts of Rungeet and Pheydong during the past two years:-

Exports from British Territory.

55. The figures given in the registers have been quoted above, but it has been ascertained that they are quite unreliable. This subject has recently been carefully investigated by reference to the railway records and by enquiry among persons in whose houses Tibetan traders at Darjeeling and Jore Bungalow are known to have resided. Such an enquiry must necessarily be incomplete, but it has elicited information which shows that the present system of registration

is inefficient. The following statement shows the variations between the quantities of certain goods ascertained to have been exported by particular persons and the quantities shown in the registers:—

'				iluo ascertained particular cases.	Value shown as registered.

		Total	•••	1,54,805	8,080
					-

The difference is Rs. 1,46,725. The registers show the value of English piece-goods exported by Pheydong as Rs. 27,940. Enquiries among certain merchants show that piece-goods to the value of Rs. 27,200 were despatched to Pheydong from Kalimpong, and that goods to the value of Rs. 28,500 were sent from Darjeeling to Kalimpong for export. The total is Rs. 55,700. Endeavours are now being made to place the system of registration of Sikkim and Tibetan trade on a more satisfactory footing. It is probable that the trade is not less than double the amount now registered, and, when it is considered that it has so many difficulties to contend with through the obstructiveness of frontier officials and the exclusion of Indian merchants, it may be inferred that a large expansion of the trade would follow upon the removal of the obstacles by which it is now impeded. A special report on this subject is under submission.

TRADE BETWEEN BENGAL AND BHUTAN.

56. The trade between Bengal and Bhutan was, as usual, intercepted at Ambaree, Hantoopara and Buxa in the Julpigoree district. The first two stations were kept open for five months, and the third station for ten months of the year. The total value of the trade registered during the past three years was—

Years.				Imports from Bhutan.	Exports to Bhutan.	Total.
				$\mathbf{R}\mathbf{s}$.	Rs.	Rs.
1881-82	•••	 	•••	1.23,048	1,05,168	2.28.216
1882-83	•••	 •••		1,11,442	86,693	1,98,135
1883-84	•••	 		96,350	1,23,000	2,19,350

It will be observed that the gross value of the trade during the past year was 10.70 per cent. in excess of the previous year's figures. The value of imports, however, decreased by 13.54 per cent., while that of exports increased by 41.88 per cent. As regards the imports, the decrease is mainly due to a large falling off in the horse trade. Under exports the increase is observable in almost all articles of traffic, notably in tobacco, European piece-goods, rice, betel-nuts, and unrefined sugar. The principal articles comprising the import trade during the past two years were—

		Imports from	Bhutan.

57. As compared with 1882-83 the falling off in the import of horses was very large, namely 267, valued at Rs. 20,025. The trade in madder or manjit, on the other hand, was exceedingly active, the increase in the quantity imported being 437 maunds or 590-54 per cent. Vegetables, fruits, and nuts showed an increase of 728 maunds, but ghee showed a decrease of 64 maunds. The figures under foreign tea, however, showed a decrease of 24 maunds. The value of manufactured woollen goods (chiefly blankets) showed an advance of Rs. 1,846. The large decrease of Rs. 3,244 in the value of "all other articles of merchandise manufactured" was due to the falling off in the imports of wax, of which only 21 maunds were registered at Ambaree against 137 maunds in the previous year; on the other hand the advance of Rs. 4,301 in the value of "all other articles of merchandise unmanufactured" was owing to an increase in the imports of musk and yaks' tails. The total value of the former amounted to Rs. 5 913 against Rs. 2,491 in the previous year, and of the latter to Rs. 1,860 against Rs. 638 in 1882-83.

58. The principal articles exported to Bhutan during the past two years

are shown below:-

59. The trade in European piece-goods exceeded that of 1882-83 by Rs. 4,573. Twist and indigo were for the first time exported to Bhutan during 1883-84 vid Buxa and Ambarce. The exports of rice showed an advance of 2,197 maunds. The quantity of metals fell off from 295 maunds in 1882-83 to 179 maunds in 1883-84. The salt trade showed a decrease of 122 maunds. In manufactured silk goods there was an advance of 46 31 per cent. as compared with the previous year. The exports of betel-nuts were 2,958 maunds against 2,158 maunds in 18-2-83. The rise in tobacco from 3,284 maunds in 1882-83 to 4,783 maunds in 1883-84 is specially noticeable.

The rates given are in English money, and are levied on innorts into Nepal only on articles, which are not taken to shops of traders or to hats in Nepal. As to articles exported from sepal and unported india, nothing is taken from these persons who buy grain from cultivators and pay the kayati (a fee for weighing the grain), nor from those persons who buy at hats in Nepal and pay hat dues there.

STATEMENT No. IX. - Showing the duties levied by the Nepalese Authorities in the Morang district of Nepal (marching with the district of Purneah).

The above rates are levied per load, with the exception of sheep skins, bullaloos, horses, and poultry.

The rates of 1 anna to 2 annas are loved thus— 1 anna per pony, bollock, and 2 annas per load. The rate of Ro. 1-4 to Re. 1-12 is per cart.
